

ABSTRACT

5 Amino acid diamides in non α position of formula (1), wherein R_1 is selected from
amongst the group consisting of the functional groups alkyl, halogen, NO_2 , OH, OCH_3
alone or associated and R_2 is selected from the group consisting of functional groups
H, alkyl, halogen, NO_2 , OH, OCH_3 , which are useful as adjuvants for the
administration of biological active agents, as well as pharmaceutical compositions
containing these diamides of formula (1) and the use thereof for the manufacture of
antithrombotic medications and for the manufacture of a medication for the treatment
10 of a disease selected from amongst the group consisting of inflammation, cancer and
allergy.
